PROJECTOR INSTRUCTIONS

To connect your laptop to video projector for PowerPoint or other presentations:

STEP 1. Connect VGA cable from laptop video output to INTERFACE PANEL "Computer Input". If presentation contains sound, connect 3.5mm audio cable from laptop earphone/audio jack to INTERFACE PANEL "Audio Input".

STEP 2. On CONTROL PANEL, power up the projector by pressing "ON". Projector will come on after a brief warmup.

STEP 3. On CONTROL PANEL, choose "Laptop" as your input source.
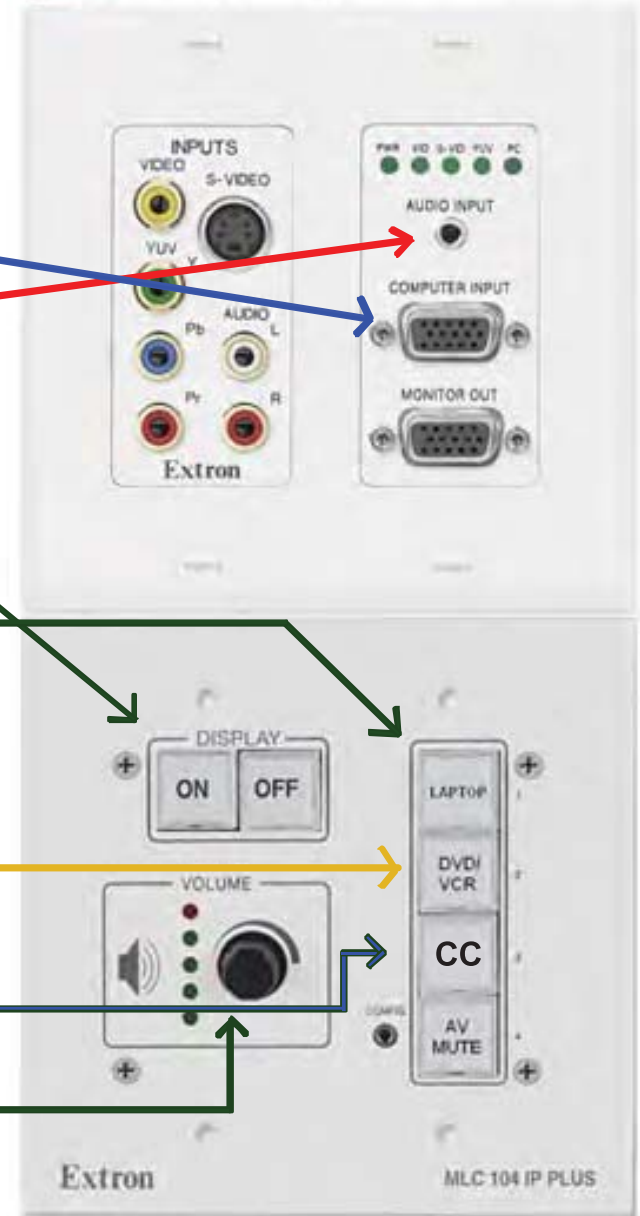

STEP 4. Power up your laptop and allow the projector to detect it's signal. You should see the laptop video projected as the laptop boots up.

To view input from other sources, power up the projector and choose the appropriate source.

STEP 5. On CONTROL PANEL choose "CC" if you want closed captioning on.

Use volume Control to adjust volume.
